

# Our Peat Policy

Since the start of 2024 all compost sold by Stewarts Garden Centres is 100% peat free.

The peat free compost that we sell is sourced from trusted suppliers, ensuring that any peat replacements have been sustainably sourced. Stewarts are committed to using and selling the best quality products from sustainable sources, certified suppliers and British Ornamental Plant Producers. We are also taking into consideration the compost used by our plant suppliers.

We hope to help our customers garden successfully with peat free products by offering tips on our Peat Free Wall of Knowledge.

We are actively working to reduce the amount of peat we use on our Nursery. We have reduced the peat content in the compost we use for our home grown plants and are committed to becoming completely peat free on our Nursery in the future whilst working on maintaining plant quality and ensuring that the alternatives have also been sustainably sourced.
